

CARMENES

## **Carmenes will take the delicacy and versatility of its Easy Living Contract line to Orgatec with three new proposals**

**The Flyt collection, the Fosca chair and the Gràcia armchairs will make their debut in Cologne**

**These pieces have been designed by Francesc Rifé, Ángel Valiente and emiliana design studio**

**CARMENES will present its new Easy Living Contract catalogue at Orgatec, with specific proposals for this segment**

CARMENES will be at Orgatec, the leading fair for the furniture sector, in Cologne (Germany) from 23 to 27 October to present the subtle sophistication, comfort and versatility of its Easy Living line, which now unveils three new proposals: the Flyt sofa, the Fosca chair and the Gràcia armchairs.

These new product lines transmit warmth, balance and quality in their materials and finishes, and they reaffirm the commitment of CARMENES to top level designers. Fosca is signed by Francesc Rifé, whilst Ángel Valiente and emiliana design studio are behind the design of the Flyt sofa and the Gracia armchairs, respectively.

CARMENES will also present Hala, a light and svelte version of the Norman armchair by Arnau – Reyna, which has been reduced in scale while retaining its warmth and comfort.

CARMENES combines the craftsmanship, design and care applied to every piece with innovative industrial processes that enable the firm to respond fully and with agility to the needs of the contract and residential sector. Thanks to design, top quality materials and the constant renewal of techniques, materials and media, the products of CARMENES transmit their serene and subtle essence to the place in which they abide, whether in the home or in contract spaces.

In fact, CARMENES will present its new Easy Living Contract catalogue at Orgatec. The catalogue includes specific proposals for the contract segment, to which the company's designs and production processes are perfectly suited.

### **Sofa Flyt**

The slim and delicate silhouette of this line explores different structural possibilities to generate a sensation of visual, aesthetic and physical lightness. This sofa, with its highly formal simplicity, is distinguished by the elegance of its proportions and carefully chosen materials and finishes.

### **Gracia Collection**

With its refined and sedate lines, Gràcia is configured as a versatile collection of chairs and armchairs with an enveloping design, which provide comfort and personality to residential and public spaces

alike. Designed by emiliana design studio, Gràcia is defined by its backrest, which transmits the warm feeling of an embrace. The collection is presented in different finishes: fully upholstered or with the wooden structure, natural or stained, visible on the outer side.

***Fosca chair***

The industrial character of the new Fosca chair is the result of a framework of rigorous metallic lines in iron and a reflexive wooden seat and backrest. Designed by Francesc Rifé, this light piece is presented with various leg options and is able to connect with both contract and hospitality spaces.

***Hala armchair***

Hala is a light, svelte version of Norman by Arnau – Reyna which maintains its essence as a serene, intimate and welcoming refuge. An armchair of similar proportions but on a reduced scale which manages to find its own space in any ambience, conserving its warmth and comfort.
