

Hari

Hari Family

The particular shape of its backrests plays and intertwines with the structure, giving this family a unique and particular feel. A new collection, with chairs, stools and lounge pieces, with an industrial touch inspired by textile looms and a subtle and elegant feel inspired by delicate sewing thread.

Hari Stained Oak

Hari Stained Oak

Flexibility and personalisation have always been part of the Ondarreta and Estudi{H}ac philosophy, keeping the essence that makes it unique, the Hari family keeps growing. We introduce Hari oak. Whether the oak back rest is combined with an upholstered seat or it's kept entirely in wood, the result is an exceptional chair that brings character to wherever is placed. www.ondarreta.com

Hari Polypropylene

Hari Polypropylene / Re-Wood

Meet Hari's new, very environmentally-friendly look. Its most recent black, white and caramel versions reflect the work we've been doing to focus our production processes on caring more and more for the environment. These new options are made out of wood polypropylene (white and caramel), a material that blends waste from the wood-production process, and from recycled polypropylene (black), which incorporates post-industrial polymers and recycled material resulting from bottle caps. By using these new compounds, we seek to reduce the use of virgin fossil materials as well as the amount of waste generated during our production processes. www.ondarreta.com

Hari Bench

Hari Bench

The Hari bench is the latest addition to the Hari family. Also inspired by the world of textile looms, with a very industrial aesthetic combined with the delicacy of the threads, this bench is a product with its own character. It allows multiple finish combinations that include oak, beech and upholstery.
